The burden of chronic disease in Canada is growing...

Canadians will die from cancer or a chronic disease*

- 1 in 2 Canadians will be diagnosed with cancer
- 1 in 12 Canadians live with diagnosed heart disease
- 1 in 10 Canadians live with asthma or COPD

CanPath is Canada's largest population health research platform

CanPath is a populationhealth research platform for assessing the effect of genetics, behaviour, family health history and environment on chronic diseases.

Canada's largest population health research platform

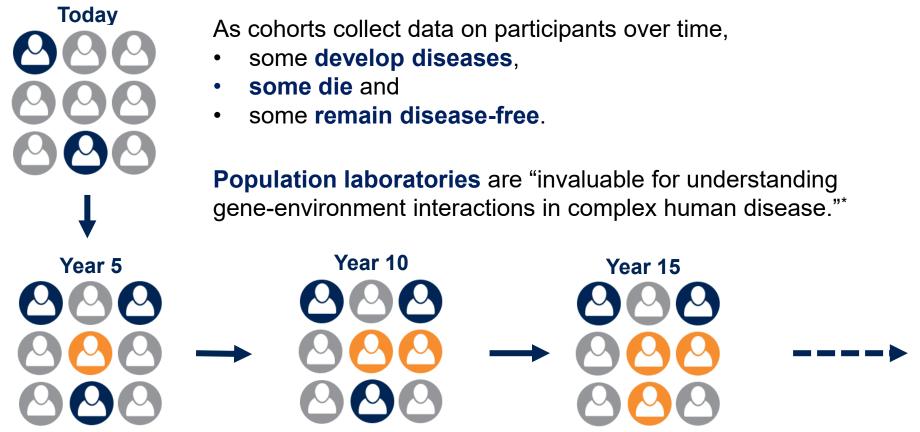

CanPath has enabled the study of the biology, behaviour and environments of over 330,000 Canadians for over a decade and continues to reveal hidden causes of common and rare chronic diseases and cancer.

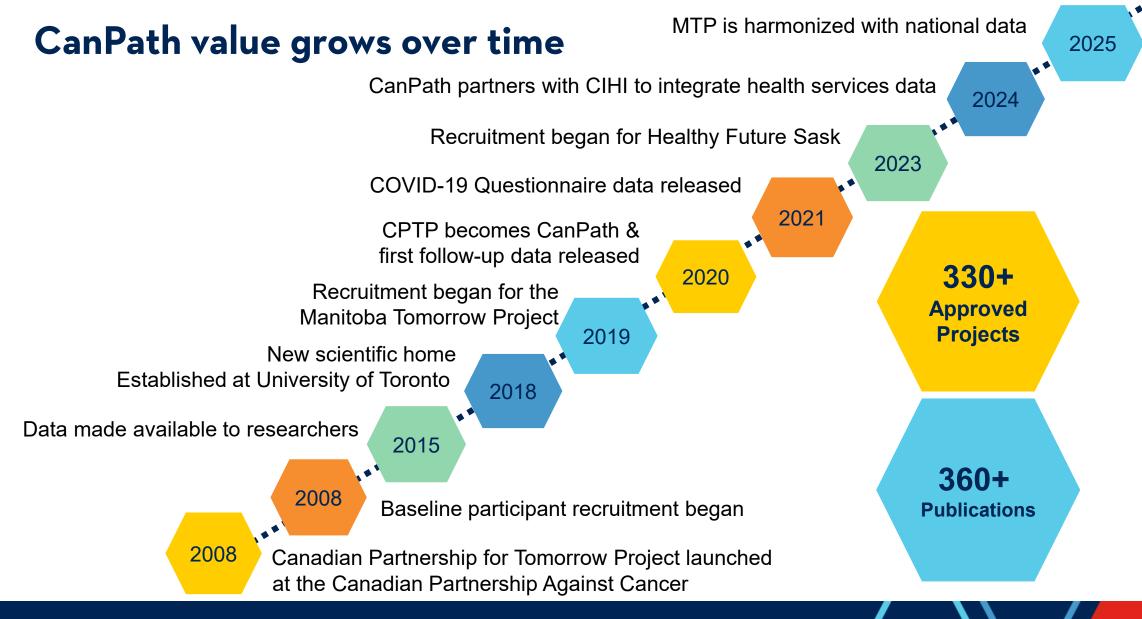

CanPath is following the health of over 330,000 adult Canadians for decades Atlantic 36,003 **BC Generations Project** Your time today builds a healthier tomorrow. cartagene 29,800 43,609 **ALBERTA'S TOMORROW** Ontario Health Study Étude sur la santé Ontario **PROJECT** CancerCare Manitoba ActionCancerManitoba Healthy 181,694 Future Sask THE MANITOBA TOMORROW PROJECT Recruiting 41,374 8,767 1,500

Large-scale population health cohorts help assess disease risks

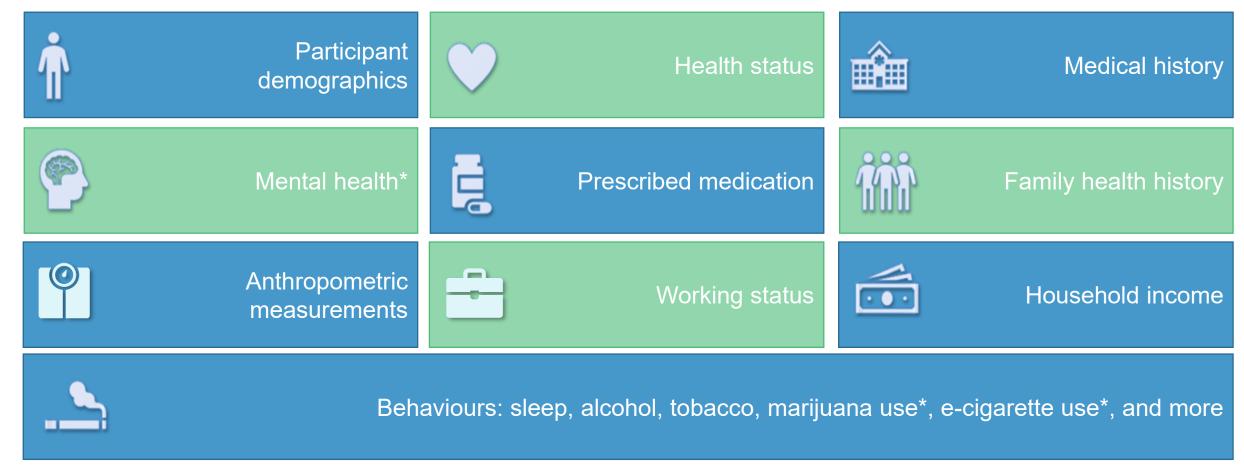

*Genes, environment and the value of prospective cohort studies, Manolio TA, 2006

All CanPath participants completed detailed baseline questionnaires & over 120,000 completed follow-up*

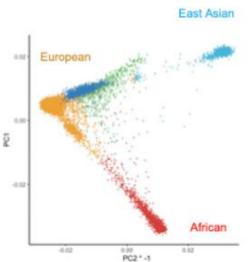

Ontario Health Study ~20,000 participants

CARTaGENE (Quebec) ~30,000 participants

CanPath ~5,000 participants

Majority of European descent (92%)
